Pediatric Cardiac Genomics Consortium: CHD GENES
Form 130: Specimen Collection
Version: C - 07/15/2012

SECTION A: ADMINISTRATIVE INFORMATION

A1. Study Identification Number:

A2. Study Visit: Proband Subject Baseline Visit

A3. Date Form Completed: MM/DD/YYYY

SECTION B: SPECIMEN COLLECTION

B1. Coriell ID:

B2. What type of specimen was collected?

Blood	Saliva	DNA extracted from Blood	DNA extracted from Saliva
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

a. Initial DNA Source Volume (ml)

B3. Date of blood draw: MM/DD/YYYY

a. Was this sample collected within 30 days of a whole blood or packed RBC transfusion? Yes
 No

i. Date of *most recent* packed RBC or Whole Blood transfusion MM/DD/YYYY

b. Type of tube(s): EDTA Vacutainer (lavender-topped)
 ACD Vacutainer (yellow-topped)

c. Number of tube(s):

d. The second tube of blood was collected for:

Cell pellet preparation	Cell line creation	Other
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

e. If Other, please explain why the second tube was collected.

B4. Date saliva collected: MM/DD/YYYY

a. Type of collection kit: Oragene DNA OG-500 kit
 Oragene DNA sponge and kit

B5. Comments or special instructions:
